# Tejaswi Naga Nookeswara Rao Kommana

Visakhapatnam, AP 530052

+91 9491123643 - tejaswi.kommana@gmail.com

## Objective

Seeking to advance a growing tech career as a Innovative team player with a passion for continuous learning, solid background in automating and scripting. Always open to opportunities that utilize my honed skills in computer science, excellent customer service skills, and strong knowledge of end-to-end development life cycles.

## Skills

**Scripting**
- Python
- Powershell
- Bash

**Programming Languages**
- C
- Java

**ITSM**
- ServiceNow

**DevOps Tools**
- HP Operations Orchestration
- GIT
- Jenkins
- Docker
- Kubernetes

- Puppet

**Web Development**
- Drupal (Content Management System)
- Angular
- Node.js
- HTML, CSS, JavaScript

**Operating Systems**
- Windows
- Linux

**Database**
- MS Sql
- MongoDB

**Other Tools**
- SCCM

## Work History

05/2019 to Current

**Associate Consultant**

*Capgemini – Bengaluru, India*

I started at Capgemini in 2019 as a Software Analyst, Undergone four months of training on Infrastructure management, Scripting languages like (Python, PowerShell), Windows, Linux and Cloud Services.

After training, I worked for Automation Dev Center(ADC) project, which will deal with automating infrastructure management for various clients.

Here is the list of use cases that I delivered during my work experience.

**Automation of SQL(Oracle and MSSQL) Server Administrative Tasks**
- Health checks for Oracle, MSSQL databases.
- User Creation

- DB Connectivity
- DB Refresh
- Start/Stop of DB tasks

**Developed SCCM Application Deployment Automation for various clients** (DLG, Nationwide, Matalan, NESTE, Carnival)

- Create Applications and packages in SCCM
- Creates Collections
- Deploy Application/Package
- Generate Compliance reports

**Automation of SCCM Administrative tasks**

- Housekeeping Activity
- Daily Health checks

**Streamlining Employee Onboarding Process using ServiceNow**

Created Application in ServiceNow which streamlines the onboarding process to the project.

**Onboarding using Sailpoint**

Worked on Sailpoint API's for user onboarding/offboarding and user management through sailpoint.

**Developed Disk Space Analyzer for Windows**

Developed a bot for analyzing disk space usage in Windows machines(both servers and desktops).

**Bulk Snapshot Creation**

This script is created to reduce the manual effort when there are requests to bulk snapshots the script will take a CSV file with all VM names for which you intend to create snapshots. The script will check for Datastore capacity, no earlier Snapshot, Size of VM and take the snapshot for all the VM mentioned in the CSV.

09/2017 to 01/2018   **Web Designer**

*Cavelee – Visakhapatnam, India*

Designed and developed an e-commerce website during my graduation for startup named Cavelee where one can book tours, hotel rooms and daily use products.

---

## EDUCATION

04/2019   **Bachelor of Technology**: **Computer Science And Engineering**

*MVGR College of Engineering - Vizianagaram, Andhra Pradesh, India*

---

## CERTIFICATIONS

- Programming, Data Structures And Algorithms Using Python by NPTEL.
- Automation Engineer Practitioner Certification by Capgemini

---

## LANGUAGES

**Telugu**: Native Language
**English**: Proficient
**Hindi**: Intermediate
