WORK EXPERIENCE

Data Scientist
Wipro

08/2018 - Present

Achievements/Tasks

- Design data modeling processes to create algorithms and predictive models and perform custom analysis.
- Manipulate large data sets and use them to identify trends and reach meaningful conclusions to inform strategic business decisions.
- Implement algorithms and statistical models to enable a computer to automatically learn from data.

PROJECTS

1 .Loan Approved for predicting Defaulters
 (08/2018 - Present)

- Exploratory Data Analysis on Loan Customer Datasets. Identifying the missing values and filling missing data with imputation techniques. Identifying categorical values and changing categorical to numerical data.
- Exploratory Data Analysis on Loan Customer Datasets.We creating the dummy variables and concate the dummy values into the Data.Checking with correlation with training Data.
- Separating the feature variable and target variable. We need to split our dataset into two sets - a Training data set and a Test data set.
- We build machine learning models one by one.Ran a Decision Tree model on most important columns and obtained good values of sensitivity and specificity.
